**Fund Manager's Report**

In November 2025, the Fund detracted by 2.57%, underperforming the Benchmark by 53 basis points (bps) while on a YTD basis, the fund outperformed the benchmark by 242 bps, with the YTD return of -3.45%.

Malaysia's manufacturing showed fractional expansion in November with a PMI reading of 50.1pts vs 49.5pts in the previous month. The latest PMI reading suggests that GDP growth in 4Q25 should sustain at a commendable rate. To recap, Malaysia's GDP grew 5.2% in 3Q25 which was a notable acceleration from the preceding quarter's 4.4%, and well above the 4.2% anticipated by economists polled. Official forecast is 4.0-4.8% for 2025. We do not expect any more revisions in OPR following the 25bps cut by BNM in July. Inflation ticked eased to 1.3% in October from 1.5% in September, driven by softer costs of food and housing.

Equity markets regionally seem to have recovered almost fully from Liberation Day tariff-related sell-off in April, and Malaysia is no exception. However, given the current uncertain global environment, we believe near term volatility is expected to continue especially due to the US administration's unpredictability. Trump's trade policies could weigh on market confidence and pressure Malaysia's growth and earnings outlook despite improving clarity recently. That said, downside risks may be partially cushioned by several supportive domestic driven initiatives and factors. We maintain balanced approach but tilt towards sectors with better clarity of earnings.

^Based on the fund's portfolio returns as at 15 November 2025, the Volatility Factor (VF) for this fund is 11.14 and is classified as "High" (source: FIMM). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by FIMM based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. We recommend that you read and understand the contents of the Master Prospectus (Islamic Funds) dated 28 April 2023, which has been duly registered with the Securities Commission Malaysia, before investing and that you keep the said Master Prospectus (Shariah-Compliant Funds) for your records.
