Fund Manager's Report

In November 2025, the Fund decreased 1.67%, outperforming the Benchmark by 37 basis points (bps) which was mainly attributable to the Fund's overweight in Materials and Information Technology, the underweight in Utilities and Consumer Discretionary, as well as the selection in Consumer Staples and Healthcare.

Malaysia's manufacturing showed fractional expansion in November with a PMI reading of 50.1pts vs 49.5pts in the previous month. According to S&P Global, new orders were the key point of improvement during the month, rising to the greatest extent since April 2022. Consequently, purchasing activity and staffing saw a notable uplift. That said, firms hesitate to raise production levels citing raw material shortages, higher competition, and rising tax burden, some of these manifesting themselves in cost inflation. Business sentiment improved sharply during the month, with the degree of confidence the highest since July 2013, underpinned by hopes of business expansions, new product launches, and higher customer numbers. The latest PMI reading suggests that GDP growth in 4Q25 should sustain at a commendable rate. To recap, Malaysia's GDP grew 5.2% in 3Q25 which was a notable acceleration from the preceding quarter's 4.4%, and well above the 4.2% anticipated by economists polled. Official forecast is 4.0-4.8% for 2025. We do not expect any more revisions in OPR following the 25bps cut by BNM in July. Inflation ticked eased to 1.3% in October from 1.5% in September, driven by softer costs of food and housing.

The FBMS's valuation is below to historical mean level at 17.6x. More clarity on the new Government's policy posture, in our view, should reduce the current risk premiums applied to the market. Sustained strength in domestic investments (both DDI and FDI), fiscal consolidation gathering pace (in particular, subsidy rationalisation initiatives) and the strengthening of the Ringgit are factors we see supportive of the further narrowing of risk premiums and consequently higher valuation multiples.

We remain constructive on sectors that stand to gain from the NETR, including Utilities, Construction, and Property. We also like select Consumer names given the strong investment momentum in Malaysia, and sectors that benefit from the stronger Ringgit. Key risks are the derailment of Malaysia's macroeconomic recovery and corporate earnings growth due to the larger-than-expected impact of rising inflation, slower global economic growth, and heightened geopolitical risks.

^Based on the fund's portfolio returns as at 15 November 2025, the Volatility Factor (VF) for this fund is 12.2 and is classified as "High" (source: FIMM). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by FIMM based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. We recommend that you read and understand the contents of Principal DALI Opportunities Fund Prospectus Issue No. M5 dated 14 April 2023 which has been duly registered with the Securities Commission Malaysia, before investing and that you keep the said Fund Prospectus for your records. Any issue of units to which the Fund Prospectus relates will only be made upon receipt of the completed application form referred to in and accompanying the Fund Prospectus, subject to the terms and conditions therein. Investments in the Fund are exposed to risks associated with investment in Shariah-compliant warrants, sector risk, stock specific risk. You can obtain a copy of the Fund Prospectus from the head office of Principal Asset Management Berhad or from any of our approved distributors. Product Highlight Sheet ("PHS") is available and that investors have the right to request for a PHS; and the PHS and any other product disclosure document should be read and understood before making any investment decision. There are fees and charges involved in investing in the funds. We suggest that you consider these fees and charges carefully prior to making an investment. Unit prices and income distributions, if any, may fall or rise. Past performance is not reflective of future performance and income distributions are not guaranteed. You are also advised to read and understand the contents of the Financing for Investment in Unit Trust Risk Disclosure Statement before deciding to obtain financing to purchase units. Where a unit split/distribution is declared, you are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from pre-unit split NAV/cum-distribution NAV to post-unit split NAV/ex-distribution NAV; and where a unit split is declared, the value of your investment in Malaysian Ringgit will remain unchanged after the distribution of the additional units.

Carefully consider a fund's objective, risks, charges and expenses.
